XMAX V3 PRO

X Max has designed the V3 Pro as an update to the V2 Pro, the newly updated device features a small hybrid heating system that functions predominantly with convection. The V3 pro delivers decent-quality vapor but can start to become harsh when pushed closer to its temperature limit of 200°C. X Max included a cup-shaped attachment for those who want to use wax. The vaporizer itself is on the lower end of the performance spectrum as its overall build quality does not compare with similar price range units like the Tronian Milatron.

ARIZER AIR SE

The Arizer Air SE is the latest 2023 product offering from the renowned brand, Arizer. Designed as a value option among dry herb vaporizers, it retains key features from its predecessor, the Arizer Air. Unique to this device is the inclusion of a removable 18650 battery that provides reliable power for the operation. Furthermore, it incorporates a dual-button control system, allowing users to choose from five preset temperature levels, ensuring an adaptable vaporizing experience according to individual preferences. The preset temperature levels are visually communicated to the user through a color-changing LED, which cleverly doubles up to indicate the initiation of the heating process once the settings have been altered, as well as the battery level.

THE CORE 2.1

The Shenzhen Crossing Core 2.1 is the updated version of the Core 2.0 and The Core 1.0 now features a non-rebuildable 3D atomizer as opposed to the rebuildable Atomizer on the Core 2.0. The difference in atomizers makes Core 2.1 a better quality option since the non-rebuildable atomizer negates the need to purchase tools to dismantle the atomizer itself. The Core 2.1 features one-button functionality and a fully heated ceramic vaping surface, not to mention the carefully tuned heat settings and aluminum/glass vapor pathway.

HIDR8 OLA

The Hidr8 Ola is a straightforward Vapor Cup that can vaporize wax and concentrates, which is also compatible with 510-Threaded cartridges. It features 4 voltage settings ranging from 2.5v to 4.0v. The different settings are indicated by a LED located under the glass cup. The device is controlled via a single-touch button. When comparing this device to others, the external design, materials used, and general styling are the main things to consider. The Hidrate Ola is one of the lower-end units regarding the quality of materials used but is also priced attractively as a result.

ZENCO DUO

The Zenco Duo is a high-quality Vapor Cup innovation that can create heavy sippable vapor using a variety of extracts. The unit features a triple glass heating element right out of the box, which is great at vaporizing your solid concentrates. This unit is also compatible with 510-Threaded cartridges. Similar to other Vapor Cups, it shares the 2-part base and glass system design but with a noticeable difference in external material quality when compared to lower-priced Vapor Cups. The Zenco Duo features a whopping 2200 mAh battery, which is relatively high for this category, and is very convenient for users that enjoy slower-paced or longer sessions.

ZEUS Xtruder

The patent pending Zeus Xtruder dry herb mill effectively and conveniently prepares your material with consistent results each time. Designed to easily grind and load dry herb directly into Zeus ArcPods for a mess-free experience, the Zeus Xtruder makes dry herb preparation a breeze even for the newest of users; a standard for 3rd generation vaporizers. Once the ArcPod is filled, the Xtruder is designed to eject the pod from the bottom of the device.

Using the Xtruder:

- Remove Zeus ArcPod Cap at the bottom of the Xtruder and place ArcPod.
 - Place Cap with ArcPod back onto the Xtruder
 - Remove top of the Xtruder and fill it with your desired herb.
 - Place top back onto the Xtruder and begin grinding
 - For best results it is recommended to grind 3 times clockwise, 1 time counterclockwise until ArcPod is filled.
 - Once the ArcPod is filled, it will automatically eject from the Xtruder.
- Place a lid onto the ArcPod and enjoy.

PACKAGE CONTENTS:

- 20 x Grime Sticks

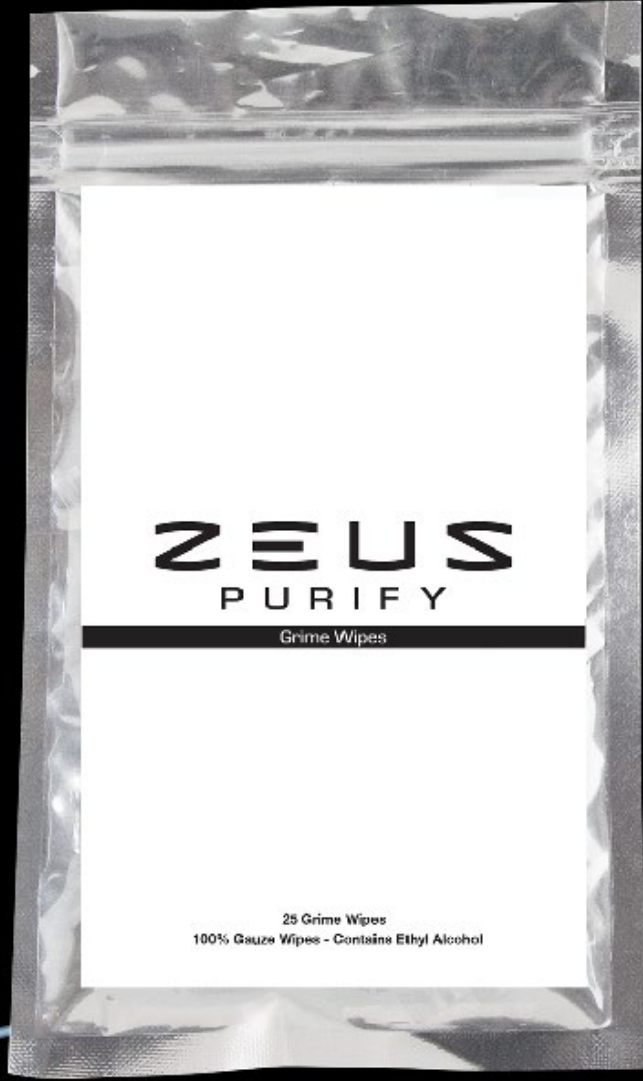

HOW TO USE:

1. Remove ZEUS Grime Stick from package.
2. Snap top of Grime Stick on the indicated line.
3. Let the alcohol drain to the swab's other end.
4. Use the alcohol-moistened end to clean the metal, glass or ceramic component of your vaporizer.
5. Discard Grime Stick.
6. Rinse external vaporizer component or heat up the vaporizer to remove excess ethyl alcohol particles in chamber.
7. Repeat as needed.

ZEUS PURIFY GRIME WIPES

Keep your units and accessories in tip top shape with the ZEUS Wipes. Each pack comes with 25 ethanol soaked cleaning wipes, perfect for glass, ceramic, and metal.

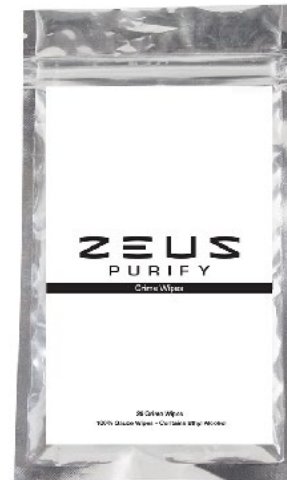

COMPATIBILITY
